Together we are unbreakable!

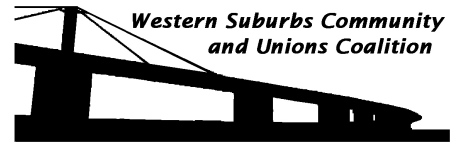

The Western Suburbs Community and Unions Coalition is a broad based, grass roots organisation of local workers, unionists, community members and groups concerned about the harsh effects of the Federal Government's Industrial Relations laws on the lives of working people, families and communities.

The new IR laws are leading to the destruction of hard won working conditions, loss of entitlements, increased job insecurity and lower living standards for all workers, families and communities. Many long held trade union and workers' rights will be wiped out.

These laws can be rolled back or made unworkable by showing the Federal Government and big business that working people, their families and their communities will continue to stand together to defend our hard won rights and conditions.

GET INVOLVED

Contact us to find out where your local group meets.
